

SPECIAL & CUSTOMISED

Customized brushes are designed for special industrial requirements. Various types of fill materials are available for perfect match for each customized brush.

There are many choices of brush fillings and virtually an infinite number of brush specifications within each brush type. Fortunately, we easily manufacture orders to our customers' individual requirements. This provides the proper filament stiffness, and allows for customers' unique modifications of length and trim, thus providing the ideal brush for the special application.

We can deliver a custom-tailored brush solution that meets the performance, quality, and budgetary specifications of the application.

We blend the brushes developed and designed by our engineers with our knowledge, experience and experience to meet the needs of our customers.
